

Compass is a cloud-based student information system that can be accessed by parents through an online Parent Portal. The portal is accessible via a web browser and/or by using the Compass School Manager mobile application ([iOS](#) and [Android](#)).

Compass will deliver access to relevant and timely information about our school and your child's progress. Specifically, the portal provides you with the ability to:

- View up-to-date class and school attendance information
- Enter past and future absences for your child
- Access your child's Semester Reports
- Download and print upcoming excursion information
- Book parent-teacher conferences
- Update your registered email and mobile number (used for SMS alerts)
- Access information regarding upcoming events and news via the School Calendar and News feeds

The Welcome to Compass brochure provides additional information about the parent portal.

Welcome to Compass
